

MAKING LIFE EASIER

WELCOME HOME

Imagine driving up to your garage and pressing a button to see the door effortlessly roll up and away from sight. No more getting out of the car in all weathers and struggling to unlock and lift a heavy garage door.

Our range of Automatic Roller and Sectional Garage Doors make life easier for you but they offer much more than just convenience.

Their compact design creates extra space in your garage and your driveway and their insulation and acoustic qualities are five times better than a conventional steel door.

All doors are made to measure and our combination of finishes, colour and design options ensure that they fit perfectly with the look and feel of your home.

Whilst it is important that your door is aesthetically pleasing, it is only part of our brief - utilising high-quality materials, top-quality manufacturing and our 15 years of expert craftsmanship ensures that your door not only looks good but continues to work effortlessly for many years to come.

SPACE SAVING

Perfect for the short driveways or for those that open onto the street. They allow you to park your car close up to the door and they don't block off ceiling space inside your garage. Bespoke manufacturing increases the width and height of your garage opening.

EFFORTLESS OPERATION

Perfect for the elderly, as well as the modern family, at the touch of a button you can see your garage door rise smoothly as you approach your driveway. Courtesy lighting aids your exit from the garage.

ENHANCES YOUR HOME

Your door can be supplied in a wide choice of attractive colours, finishes and designs. Their insulation and acoustic qualities retain warmth and reduce noise. Whatever the style of your house we have a door to compliment your home.

SAFETY AND SECURITY

All doors are fitted with a safety edge or beam and an anti-drop safety brake to prevent accidental trapping or personal harm from a descending door. Each door also has an automatic drive down locking system and can incorporate a security alarm to deter intruders.

KEY FEATURES AT A GLANCE

Whether your house is built in the traditional country house style and modern semi detached, our range of garage doors provides a full range of options to fit perfectly with your home.

To view all the options available to you why not visit our website at www.excelrollergaragedoors.co.uk

Safety First

Safety brakes and edges are fitted as standard to comply with EN12453 - Safety in the use of power operated garage doors. The brakes lock off, like a seatbelt, if the motordrive or motorbrake fails, which in turn stops the door dropping.

Security Locking System

An automatic drive down locking system combines with high polyamide links to ensure that the door cannot be forced up when lowered.

Manual Override

A manual override unit enables the door to be wound up manually in the event of a power failure.

Power Drive Unit

High quality tubular motor, with manual override.

Automatic Operation

The doors are operated by a remote keyfob handset.

High Thermal and Sound Insulation

The doors are made from interlocking twin wall aluminium sections containing CFC free foam to give great insulation from noise and the elements.

Weatherproof

Rubber seals to the sides and along the bottom of the door ensure your garage remains dry.

Smooth and Quiet

Our doors incorporate a double roller system with soft lead rollers powered by 'Somfy Motors', the world leaders in the motorisation market, also our tracks are brush lined - all adding up to the ultimate in quiet and smooth operation.
